WAIIREGAN HOUSE Norwich

WAIREGAN HOUSE Norwich undergone no change to correspond with the sudden cessation of the speculative activity. The feverishness of the interest manifested in the health of E. H. Harriman has abated, and this seems the only explanation to one this seems the only explanation to one of the change in the complexion of the market. The withdrawal of orders on the large scale recentle prevailing suggested more than anything else that the capitalists responsible for them had concluded to let the market rest had concluded to let the market rest for a time. The punishment administered to the bears on Monday served to admonish them that the bull party was able still to exercise control of the market. This is taken to account for the comparative timidity of the bear party since that time. The renewed ebullition from Boston through the medium of the advertising columns and the telegraph had its effect in the latter part of the day and imported some new courage to the bear ported some new courage to the bear party but they re-bought hastily. The ethargic demand manifest throughout the day was calculated to invite at-took from the bear party in the specu-lation. The less favorable crop aspect was dwelt upon to some extent to warrant the contention for lower prices. Further detailed accounts of the condition of cotton emphasized the expectation of a showing of serious deterioration in that crop in the government estimate to be published to-morrow. The cotton stocks, both amongst the railroads and the industrials, were amongst the few to show some strength today. But the largest part ployed by cotton exports in our foreign trade makes the prospect of that crop of peculiar interest at this time owing to the importance of the exchange situation on the future of the money market. Last year's de-cline in exports of merchandise and the very heavy imports threw the ex-change situation out of normal. In order to tide over the situation, Americon borrowings in Europe have been very large, estimated by some author-ities at as high as \$500,000,000 now outstanding as indebtedness against this country. Reliance has been placed on a subsidence of the excessive import movement and upon the placing of some forthcoming issues of rall-road securities abroad as well as upon teh exports of domestic products to afford resources for meeting this in-debtedness as it matures. A serious shortage of exportable cotton would upset one factor in these calculations. London sent reports of a weak market
